8' WALL ASSEMBLY

SEE SHEET 2 FOR BOM AND EXPLODE

20' WALL ASSEMBLY

SEE SHEET 5 FOR BOM AND EXPLODE

Technical drawing of a staircase railing system. The drawing includes three views: a side elevation, a detail of the railing profile, and a perspective view.

The side elevation shows a railing system with a base rail and a handrail. The railing is composed of horizontal balusters and a vertical support post. The handrail is shown in a curved profile. The base rail is shown in a straight profile. The railing is mounted on a wall.

The detail view shows a cross-section of the railing profile. The profile is labeled with a height of 84.000. The profile is shown in a cross-section view, highlighting the internal structure and the mounting details.

The perspective view shows the railing system installed on a staircase. The railing follows the slope of the stairs, providing a clear view of the balusters and the handrail.

Technical drawing of a staircase showing three views: a plan view, a side elevation, and a perspective view.

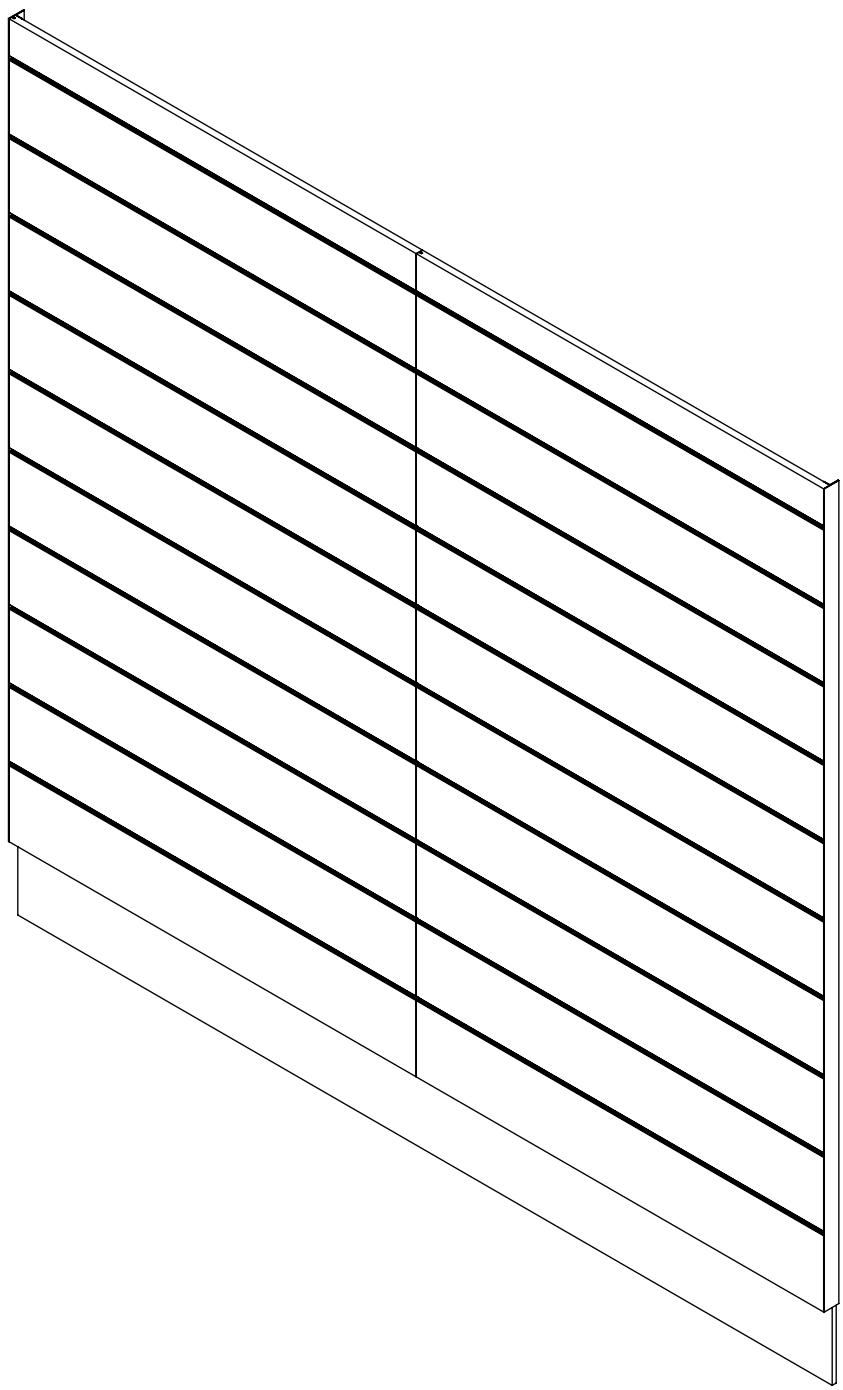

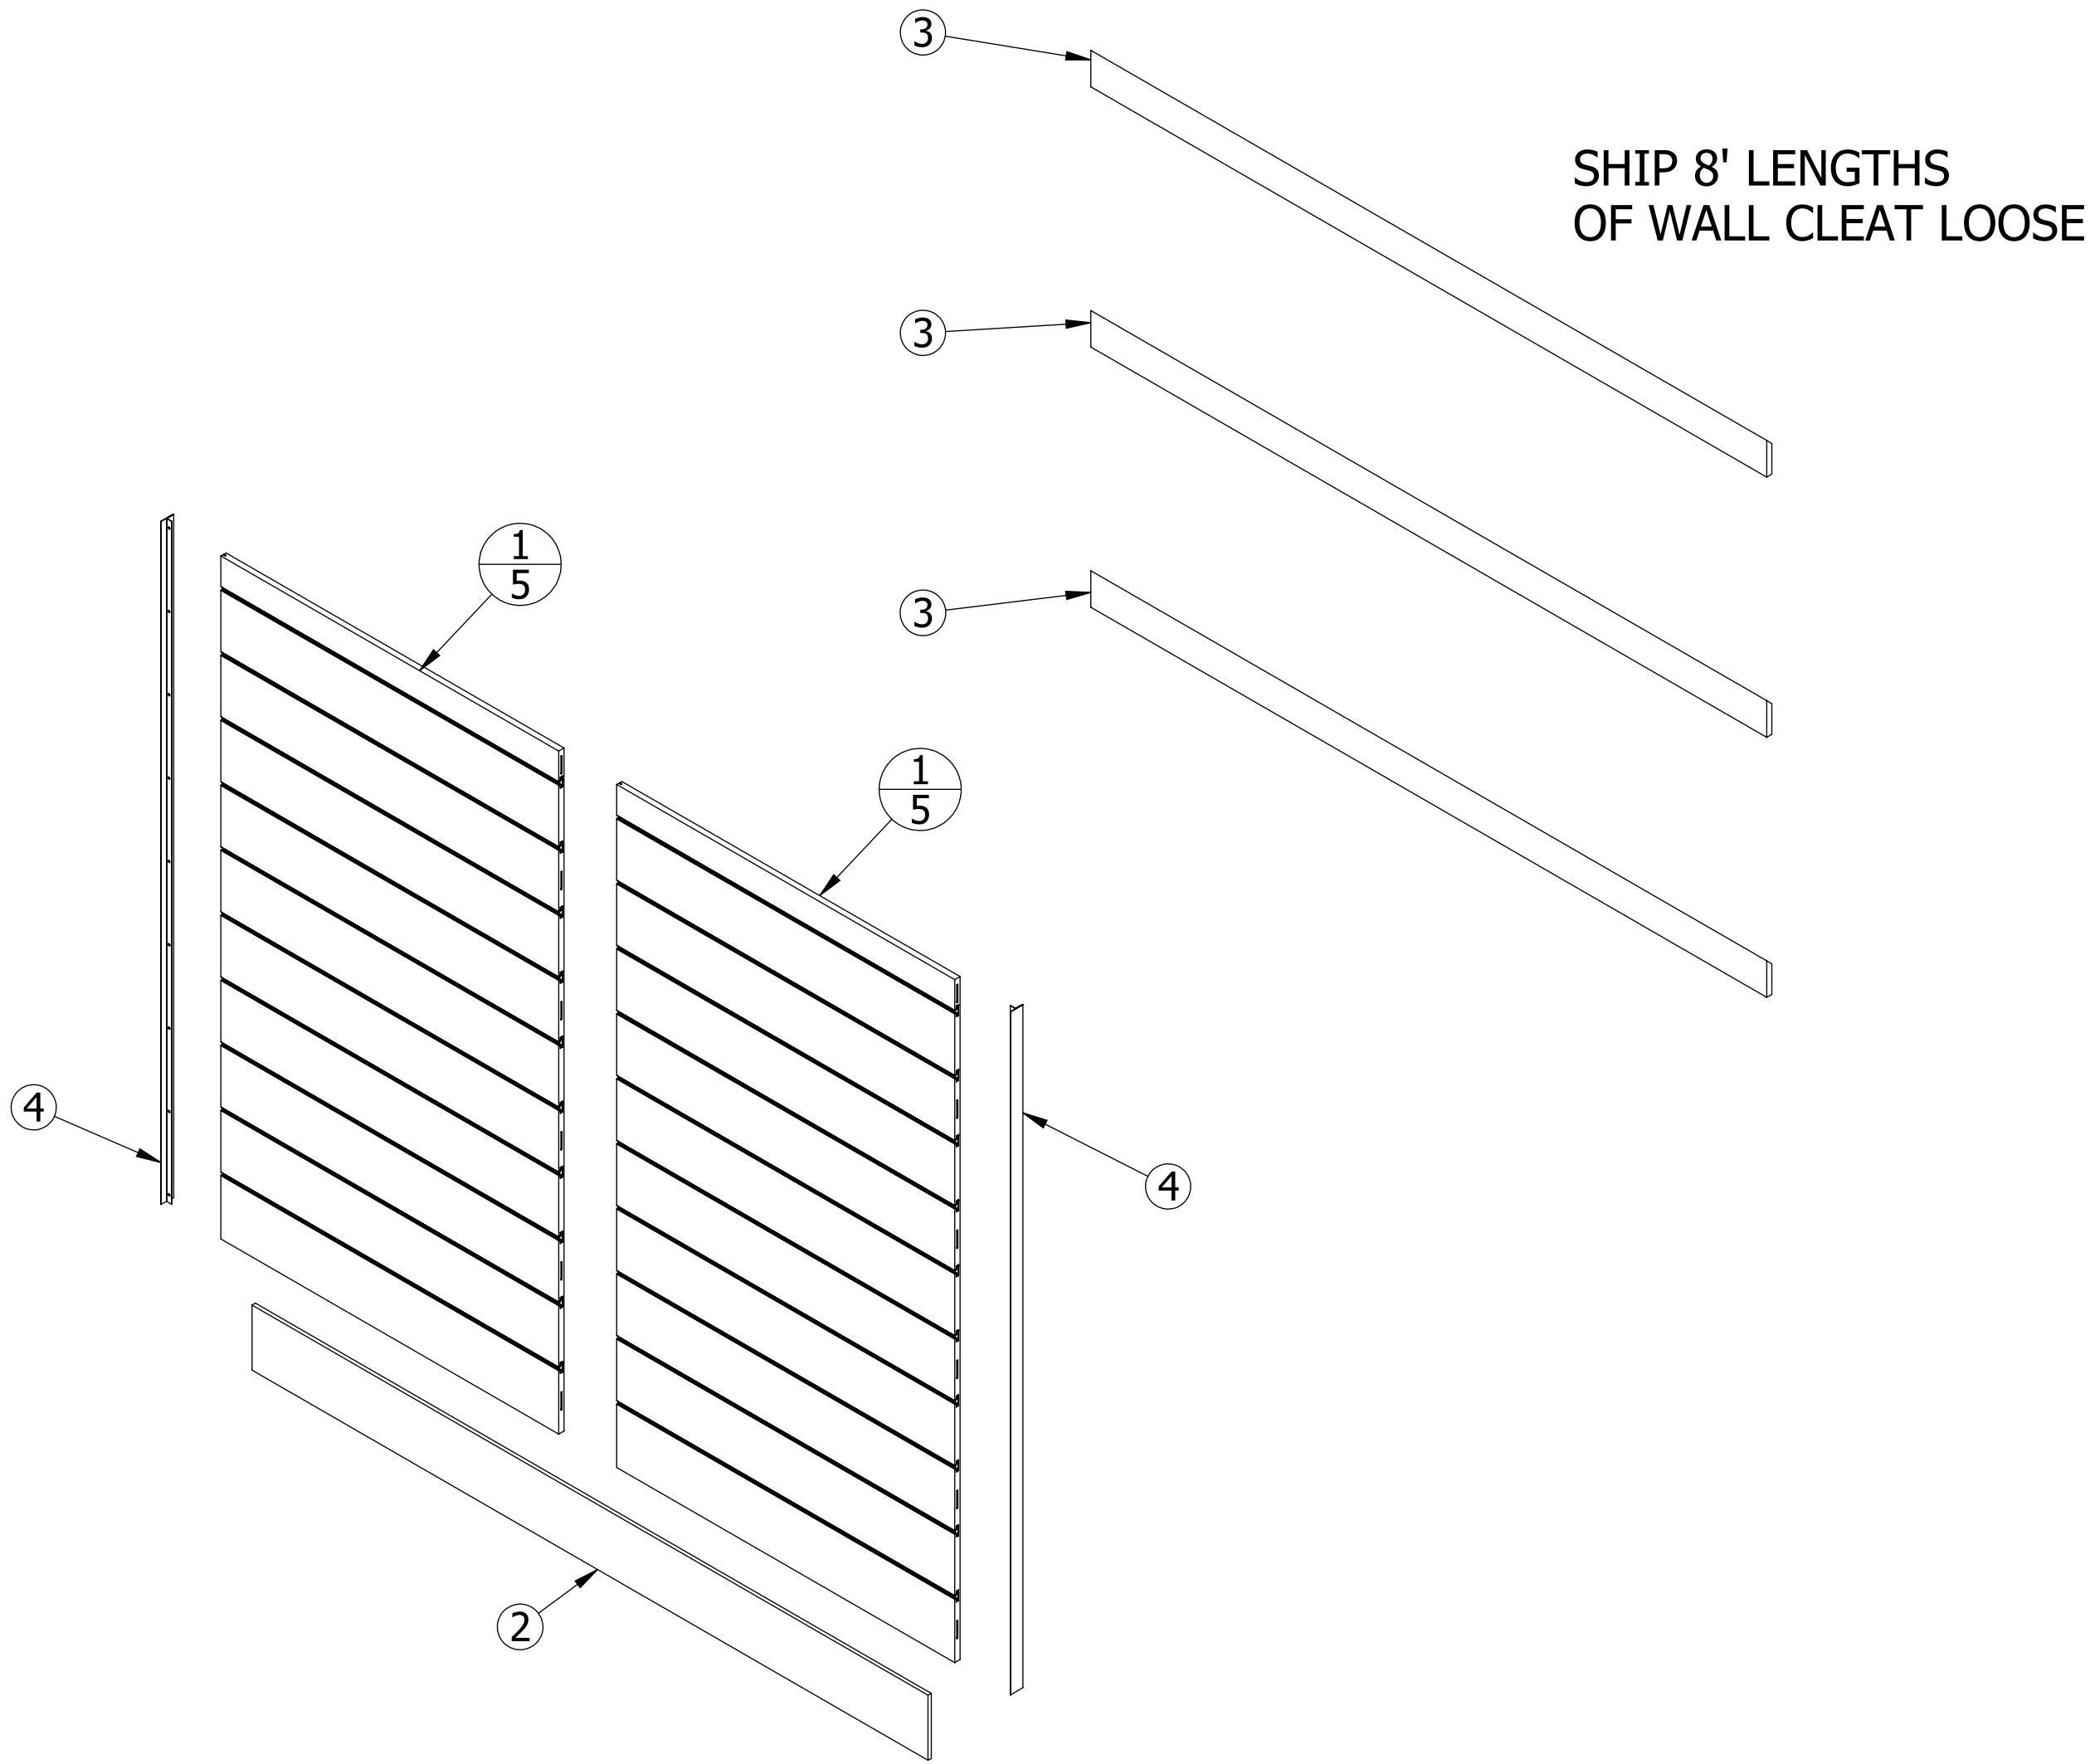

- Plan View (Left):** A rectangular staircase with a width of 144.000 and a depth of 8.000. The drawing shows the layout of the steps and the overall dimensions.
- Side Elevation (Middle):** A vertical view showing the height of the staircase, which is 84.000. It also indicates the depth of the steps, which is 8.000.
- Perspective View (Right):** A 3D isometric view of the staircase, showing the steps and the overall structure from an angled perspective.

Technical drawing of a rectangular structure with a sloped top edge. The structure is divided into a header section on the left and a main body. The header section contains a stylized logo. The main body is a grid of 10 rows and 5 columns. The overall width is 288.000. The height of the header section is 84.000, and the height of the main body is 92.000.
